## **SECURITY RELATED INFORMATION TO MARINERS**

**Q6114/2019/001**

### **PUBLICATION OF NEW EDITION OF THE ADMIRALTY MARITIME SECURITY CHART Q6114 – WEST COAST OF AFRICA INCLUDING THE GULF OF GUINEA ON 28 FEBRUARY 2019**

A New Edition (NE) of the ADMIRALTY Maritime Security Chart (MSC) Q6114, West Coast of Africa including The Gulf of Guinea will be published on 28 February 2019.

The chart has been reschemed and produced in portrait rather than landscape, this format better supports the North / South bias of the geographical content.

An enhanced window has been provided and contains the Lagos and Cotonou Secure Anchorages Areas and Maritime Exclusion Zones.

The NE has additions that include the secure anchorage areas and maritime exclusion zones in the Bight of Benin. The limits have been revised to provide improved coverage of the MDAT-GoG Voluntary Reporting Area.
