*Former Notice 1/16 is cancelled. Additions and amendments to the former Notice are indicated by sidelines.*

**ADMIRALTY Tide Tables - General.**

In the British Isles, Chart Datum is approximately the level of Lowest Astronomical Tide (LAT) and all metric charts are referred to this level. For the few remaining fathoms charts, a correction to the predictions from ADMIRALTY Tide Tables (ATT) may be required. A comparison between the tidal heights given in the tidal information panel on the chart and those given in Part II of ATT will show the amount involved; when such a correction is necessary the amount should be subtracted from the height predicted in ATT.

Elsewhere, the level of Chart Datum is determined by the country having primary charting responsibility for the area.
